

### Upper Green - Kingsley

As many of you will have seen the development of the Old Piggery Site is proceeding and should be completed within a few months. For health and safety and security reasons the developer has had to erect a large hoarding around the site.

This hoarding has encroached onto Kingsley Parish Council owned land (part of Upper Green) and will be removed once the development is complete. The developer has agreed to re-instate this part of the green by removing all rubble and building materials and leveling the land to remove potholes, tracks, trip hazards etc.

The Parish Council is also considering how to enhance this end of the Green so that the whole Green can be used for public leisure and recreation (the legal purpose of a Village Green).

Once the development is nearing completion the Parish Council will take steps to stop cars driving across and parking on the Green just to the west of the Old Piggery Site. Except under very specific circumstances driving and parking on a Village Green is unlawful.

Cllr Chris Rigden
